

Noah Bolte

STUDENT

EDUCATION

Kirkwood Community College
University of Iowa
Iowa City, IA
BS in Geography, GISci track
GPA 3.52
Graduating in May of 2026

REFERENCES

Available upon request

FUNCTIONAL SKILLS

Communication
Problem-solving
Spatial Analysis
Raster Processing
Surveying
Hydrologic Modeling
SQL / PostGIS
Interpolation (Kriging, IDW, etc.)
Kernel Density
Environmental GIS
Health GIS
Cartographic Design
Geovisualization
Some remote sensing
ArcGIS Pro, ArcGIS Online, Survey123, Fieldmaps, QGIS, and other related software
Collecting real-time data
Creating and maintaining a GIS database
Familiar with ArcGIS geodatabases

INTERESTS

I am interested in the transportation industry, ornithology, geographic information systems, video editing, and the push-pull dynamics between the natural world we live in and the man-made impact on the environment. I am involved in a past-and-present railroad photography/videography club, a couple birding clubs, and have create video and photo content of these subjects. Eventually, I'd like to use my GIS experience to map all of the videos and pictures I've uploaded to the internet, irrespective of the subject matter.

EXPERIENCE

January 2025 - present
Lead on Burlington Community Risk Assessment Project and Johnson County Solar (1 semester each) / Volunteer for Johnson County Tree Survey (2 semesters) • Iowa Community Integrated Geography Organization (ICIGO)

~2012 - present
Amateur video editor, familiar with Sony Movie Studio and Adobe Premiere Pro, as well as other related software

~2018 - present
Amateur photo editor, familiar with Adobe Photoshop, Lightroom, Lightroom Classic, and other related software

COMMUNICATION & LEADERSHIP

Worked on collaborative group GIS projects which required shared data management and workflow coordination between multiple individuals

Document workflow summaries for GIS-related projects and can communicate that to leadership figures or groupmates
Coordinating project teams, workloads, tasks, etc.

Concise communicator, will bring up problems and snags as soon as possible

Co-led two community-based GIS projects, one for Johnson County solar suitability, and one for Burlington risk assessment
